

PRACTICAL 8

Aim

To design a Gym Admission Form and validate form fields using JavaScript events.

Case Study

A Gym Admission Form is created to collect member details such as name, email, phone, age, sex, eye color, height, weight, athletic ability and membership type. JavaScript events provide live validation while entering the information.

index.html

```
<!DOCTYPE html>
<html>
<head>
    <title>Gym Admission Form</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

<div class="container">
    <h1>Gym Admission Form</h1>

    <form id="gymForm">
        <label>Name</label>
        <input type="text" id="name" placeholder="Enter name">
        <span id="nameError"></span>

        <label>Email</label>
        <input type="email" id="email" placeholder="Enter email">
        <span id="emailError"></span>

        <label>Phone</label>
        <input type="text" id="phone" placeholder="10 digit number">
        <span id="phoneError"></span>

        <label>Age</label>
        <input type="number" id="age">
        <span id="ageError"></span>

        <label>Sex</label>
        <input type="radio" name="sex" value="Male"> Male
        <input type="radio" name="sex" value="Female"> Female
        <span id="sexError"></span>

        <label>Eye Color</label>
        <select id="eyeColor">
            <option value="">Select</option>
            <option>Black</option>
            <option>Brown</option>
            <option>Blue</option>
            <option>Green</option>
        </select>
    </form>
</div>
```

```

        <span id="eyeError"></span>

        <label>Height (cm)</label>
        <input type="number" id="height">
        <span id="heightError"></span>

        <label>Weight (kg)</label>
        <input type="number" id="weight">
        <span id="weightError"></span>

        <label>Athletic Ability</label>
        <textarea id="ability" placeholder="Describe your athletic
ability"></textarea>
        <span id="abilityError"></span>

        <label>Membership</label>
        <select id="membership">
            <option value="">Select</option>
            <option>Monthly</option>
            <option>Quarterly</option>
            <option>Yearly</option>
        </select>

        <button type="submit">Submit</button>
        <p id="success"></p>
    </form>
</div>

<script src="script.js"></script>
</body>
</html>

```

style.css

```

body {
    font-family: Arial;
    background: #e8f0fe;
}

.container {
    width: 500px;
    margin: 30px auto;
    padding: 25px;
    background: white;
    border-radius: 10px;
}

h1 {
    text-align: center;
    color: #174ea6;
}

label {
    display: block;
    margin-top: 12px;
    font-weight: bold;
}

input, select, textarea {
    width: 100%;
}

```

```

padding: 9px;
margin-top: 5px;
box-sizing: border-box;
}

input[type="radio"] {
width: auto;
}

span {
color: red;
font-size: 12px;
}

button {
width: 100%;
margin-top: 20px;
padding: 12px;
background: #174ea6;
color: white;
border: 0;
border-radius: 5px;
}

#success {
color: green;
text-align: center;
}

```

script.js

```

const form = document.getElementById("gymForm");

function check(id, error, condition, message) {
const input = document.getElementById(id);
document.getElementById(error).textContent =
condition ? "" : message;
return condition;
}

function validate() {
let valid = true;

valid &= check(
"name", "nameError",
/^[A-Za-z ]{3,}$/ .test(name.value.trim()),
"Enter a valid name"
);

valid &= check(
"email", "emailError",
/^[^\s@]+@[^\s@]+\.[^\s@]+$/ .test(email.value),
"Enter valid email"
);

valid &= check(
"phone", "phoneError",
 /^[0-9]{10}$/ .test(phone.value),
"Enter 10 digit phone"
);
}

```

```

    valid &= check(
        "age", "ageError",
        age.value >= 16 && age.value <= 80,
        "Age must be 16-80"
    );

    valid &= check(
        "eyeColor", "eyeError",
        eyeColor.value !== "",
        "Select eye color"
    );

    valid &= check(
        "height", "heightError",
        height.value >= 100 && height.value <= 250,
        "Enter valid height"
    );

    valid &= check(
        "weight", "weightError",
        weight.value >= 25 && weight.value <= 250,
        "Enter valid weight"
    );

    valid &= check(
        "ability", "abilityError",
        ability.value.trim().length >= 10,
        "Describe athletic ability"
    );

    if (!document.querySelector('input[name="sex"]:checked')) {
        document.getElementById("sexError").textContent =
            "Select Male or Female";
        valid = false;
    } else {
        document.getElementById("sexError").textContent = "";
    }

    return Boolean(valid);
}

form.addEventListener("input", validate);
form.addEventListener("change", validate);

form.addEventListener("submit", function(event) {
    event.preventDefault();

    if (validate()) {
        document.getElementById("success").textContent =
            "Admission Form Submitted Successfully!";
    }
});

```

Result

The Gym Admission Form was successfully created with **live validation using JavaScript events**.
